Small Business

EBL Engineers was founded in 1972 and has extensive experience in delivering a variety of professional facilities services. Located in Baltimore, MD, EBL Engineers (EBL) is a multi-discipline facilities consulting firm, providing mechanical, electrical, security and fire protection, building automation/energy management engineering, construction management, commissioning, consulting, training and related services. EBL Engineers, LLC provides maximum coordination between design disciplines and building operators for the development of integrated facilities systems. We analyze customer requirements and develop and integrate facility programs into functional systems for a wide variety of applications, including industrial, commercial and institutional facilities, non-traditional structures, medical centers, hi-tech laboratories, vehicle support systems, military systems, and infrastructure.

SIN 246-52

Energy & Facility Management/Building Automation & HVAC Controls Functions and Services;
Professional Security/Facility Management Services

EBL Engineers has an extensive body of work involving all areas of facilities management and engineering, including facility management systems for security, fire protection, heating and air conditioning and energy management. We design systems, perform needs assessments, and evaluate operational alternatives for customers. The result is a wide array of services that are flexible and address reliability, operations, maintenance, adaptability and future requirements.

EBL is retained to produce a variety of unique and complex electrical designs for facility management. We provide a full range of services for specialized security, fire protection, HVAC control and energy management systems. EBL Engineers has performed an array of environments including: commercial/industrial buildings, education, healthcare, laboratory facilities, specialty structures, water and wastewater facilities, power plants, classified projects, and design/build commissions.

Knowledge of the latest material, techniques, building codes, technology systems and deployment methods are employed to create devices and systems that emphasize practicality, reliability and operating efficiencies.

EBL's Life Safety and Security group undertakes intricate design challenges to assure the safe functionality of a diverse array of facilities, structures, and industrial processes. Recent activities include medical/health care, hazardous materials/munitions, laboratories and test facilities, aircraft hangars, correctional facilities, industrial complexes and commercial buildings. Our fire protection division is staffed with licensed fire protection engineers, specifically trained in risk analysis hazard assessment and the design of fire protection and detection systems. To assure functional safety we integrate fire, reliability, and Life Safety Code requirements to produce credible and compliant programs and design solutions for a wide range of applications.
